

# Test Tube Messiah

Yoke Lore

I really wish I wasn't scared of confrontation or dental care  
Or going to sleep without you there  
But let me have my little madness, let me dirty up your purity  
Embrace my broken body

'Cause I'm happy most of the time  
But I really wish we didn't all have to die  
'Cause the beat of my heart will shake the earth like all those  
damn horses riding up to heaven

Take me like the earth takes a falling star  
Burn away my inflated ego as I fall into your arms

Heartbreak down on me  
Bones skin eyes blood and teeth  
Tell why I feel this in my knees  
In clockwise serenity  
I'm a devil and devotee  
Why does the end of us feel like the end of everything

But I'm gonna be okay

She's got red nails and brow hair  
The sun flood her soft eyes  
And it makes me feel sick inside  
But I don't trust in drugstore America  
I don't trust your test tube messiah's  
'Cause I know I'm gonna be okay  
I know that the universe is just like me  
Filled up with "black holes", a troubled past, and mostly empty

Take me like the earth takes a falling star  
Burn away my inflated ego as I fall into your arms

Heartbreak down on me  
Bones skin eyes blood and teeth  
Tell why I feel this in my knees  
In clockwise serenity  
I'm a devil and devotee  
Why does the end of us feel like the end of everything

But I'm gonna be okay
