

Do It For You

YONAKA

I miss the way we used to mess around
I miss the making up and making out
When it was all or nothing
We kept the engine running

Time goes oh so slow
Bars on red and the tanks on low
I don't know how we'll make it home

Lord knows
We've been walking on a tightrope
Navigating with our eyes closed
Don't think I could ever understand it
Speak my language

Do I do it for you?
Like you, you do it for me

It's always lonely when we're in the dark
I fear your love is like a fading star
Don't wanna lose this moment
So if your heart's still open

Can we work this out?
If one is none and three's a crowd
It takes two to turn this thing around

Lord knows
We've been walking on a tightrope
Navigating with our eyes closed
Don't think I could ever understand it
Speak my language

Do I do it for you?
Like you, you do it for me

Don't be shy
Come home with me
Don't be a stranger in the street
Be my friend or be my enemy, yeah

Do I do it for you?
Like you, you do it for me
