

Memory Merge

YonKaGor

Did it really happen
Or were they pieces thrown around?
The past is all built on lies
Where one word could break it down

Sorting recollections
Scanning for patterns to compare
But nothing comes up to mind
In the fragments that I can't repair

'Cause the sweetness on your face
And the tenderness of your warm embrace
Somehow they left a bitter taste
There's nothing to trace
Painful times they were all erased
And yet my body's screaming
Don't make the same mistake

Can I go ahead and surrender
To the visions that I just can't remember?
Merging all of these memories
To a blend of anomalies
Reveal all the trauma I suffered
I'll relive it all to be born much stronger
Then there's no way someone else can repeat
What you did to me

Did that really happen?
Thoughts into voices now reshaped
I wished for recovery
But was given no escape
Once merely a single touch
Now a swarm to undertake
It's surely too late for me
'Cause my limit is going to break

Now the sweetness on your face
And the tenderness of your warm embrace
Somehow they left a bitter taste (whoa, ohh)
Oh! the memories stay
Painful times are put on replay
And still my body's screaming
Don't make the same mistakes

Now, I see through all your endeavours
And the sinful scars that I'll hold forever
Tainting all of these melodies
Full of mixed-up apologies
Was there any chance for me to run?
Was there something different that I could have done?
I'm left with a mangled mind that repeats
What you did to me

There was a reason they were thrown away
Why they were locked behind from my display
And now my memory's in disarray
It forced a reinstall

Remember to forget them all (whoa, yeah)

Can I go ahead and surrender
To the visions that I just can't remember?
Merging all of these memories
To a blend of anomalies
Reveal all the trauma I suffered
I'll relive it all to be born much stronger
Then there's no way someone else can repeat
What you did to me (whoa!)

Did it really happen
Or were they pieces thrown around?
The past is all built on lies
Where one word could break it down
