

Slow Dance

Yoshi Flower

I need a break from all this raving
Too much lights and sound can't hear what you're saying
And we were both prone for the misbehaving
So even when the bass bang low and treble go high
We in trouble now, woah

My Cinderella with them vans on
Get your dance on
You don't let nobody concern you
I'm the one just take a chance on me
Nobody can hurt you while we

Slow dance
I hold you with both hands
Stay right here in this moment
While we slow dance
Look into my eyes while we turn
Look into my eyes while we turn

This place was made for escaping
But it's getting too cold on the wall where I'm hanging
The only thing missing is my hand where your waist is
And I know I might be wasted
But still I gotta say it

Cuz you're my Cinderella with them vans on
Get your dance on
You don't let nobody concern you
I'm the one just take a chance on me
Nobody can hurt you while we

Slow dance
I hold you with both hands
Stay right here in this moment
While we slow dance
Look into my eyes while we turn
Look into my eyes while we turn
Look into my eyes while we turn
Look into my eyes while we turn
