

Propeller

Young Summer

Just take me high
Cause I'm losing my breath
Little I have left
You got me harrowing
In all this tension
When your caught of your leap?

Ooh when we arrive
Yeah we arrive
You follow the lights
You follow the lights

You spinning me round and round and round forever
Whatever I am this time for worse, for better
Let's see how fast this thing can fly
Right through the night
This love is sky
To our propeller
Propeller
To our propeller

It's under control
Yeah you show me
You know the way home
We've already gone
Beyond sea level
You and I circle the stars

When we arrive
Follow the lights
Follow the lights
Follow the lights

You're spinning me round and round and round forever
Whenever I am this time for worse, for better
Let's see how fast this thing can fly
Right through the night
This love is sky
To our propeller

Propeller
To our propeller
Beyond the skin
Our bones kiss
A word of the way
A word of the way
Beyond the skin
Our bones kiss
A word of the way
A word of the way

You're spinning me round and round and round forever
Whenever I am this time for worse, for better
Let's see how fast this thing can fly
Right through the night
Love is sky
To our propeller

Propeller
To our propeller
