

We Tried

Young Summer

I've never seen a mountain
Move on its own
And I've stood inside the light
On the darkest night of my soul
I swam inside the hourglass
It started filling up so fast
From above and below

And if we never get to make it to the other side
And if we never make it to the finish line

We can say we tried
We can say we tried

Digging through the wreckage of a broke down machine
Standing on the edge of what it was and what it will be
I crawled across the broken glass
Led by voices from the past
From the past

And if we never get to make it to the other side
And if we never make it to the finish line

We can say we tried
We can say we tried
We can say we tried
Oh we tried

We tried
We tried
Ooooh
We can say we tried
We can say we tried
We can say we tried
We can say we tried

Oh we tried
