

Simplify

Young the Giant

Everything I say only seems to complicate it
Every little fight is just another night wasted
Are we gonna lose?
Is it gonna last?
Worry about the future, worry 'bout the past
Think we're gonna break before I get a chance to say this

Don't wanna live without you

Staring in your eyes, everything simplifies
Leave it all behind, everything simplifies
All we need is nothing more when everything simplifies
You and I need nothing more, everything simplifies

Stressin' over this, stressin' over that, we're fallin'
Like the whole world is banging on the door calling
Are we gonna lose?
Is it gonna last?
Worry about the future, worry 'bout the past
Filter out the noise, focus on my voice, we're fallin'

Staring in your eyes, everything simplifies
Leave it all behind, everything simplifies
All we need is nothing more when everything simplifies
You and I need nothing more, everything simplifies

Why must we complicate
Every breath we take?
Why can't you see we'll be alright?

Nothing disappears
Even the pain we've been through
But all I need is here
Don't wanna live without you

All we need is nothing more when everything simplifies
You and I need nothing more, everything simplifies
