Drive

Youngr

I stumbled outside, 4 in the morning
Last night, went down with no warning
Last thing that I remember was talking to you, yeah
On the hood of a soft-top Benz, and I
Talking shit to all your friends, and I
I wish I didn't mean what I said, but I do

You and me should take a ride sometime
Watch the world fly by in the rear view mirror
You can leave it all behind if you wanna
Come ride with me mama, we can see it all clearer
Nothing but imagination, head on with this pure temptation
Yeah, I kinda like your vibe
So, you and me should take a drive sometime

It's hard to look at you at 90 on the freeway
That's why we stop off at the beach on a weekday
I'm the star of my very own screenplay with you
Speeding down the boulevard on some Bonnie and Clyde shit
If you're the superhero, I can be your sidekick
Take the wheel girl, I'll let you drive stick too, so

You and me should take a ride sometime
Watch the world fly by in the rear view mirror
You can leave it all behind if you wanna
Come ride with me mama, we can see it all clearer
Nothing but imagination, head on with this pure temptation
Yeah, I kinda like your vibe
So, you and me should take a drive sometime

Oh, whenever I'm with you I rise and I die
But, come on and drive with me
So, you and me should take a drive sometime

So, you and me should take a ride sometime
Watch the world fly by in the rear view mirror
You can leave it all behind if you wanna
Come ride with me mama, we can see it all clearer
Nothing but imagination, head on with this pure temptation
Yeah, I kinda like your vibe
So, you and me should take a drive sometime

Drive with me, drive with me
Oh, whenever I'm with you I rise and I die
But, come on and drive with me
So, you and me should take a drive sometime
