

I remember our scene, the first  
You're as clear as the skies at night  
You lit me up with a quiet and strong light  
That night, you made me shine and glow

You never let me go no not once now I just know  
Now I'm not afraid no not anymore, yeah  
We'll find our way back sooner than later  
When the moment comes, won't you call my name, name, name, uh?

The night is slow  
But we keep goin' no need to hideaway  
Fine here, just wait, we'll shine again someday  
Just don't forget, we're not alone, no, never  
Just hold on

Just interlunar, we're good, no doubt  
You will fade a bit, but not fade out  
Moonrise again, yeah, I can tell, yeah  
If you already know it well, yeah  
Just interlunar not the end, baby

You are still my moonlight  
So I'll be okay just fine  
I'll see you around  
Still glowing by your side

You never let me go no not once now I just know  
Now I'm not afraid no not anymore, yeah  
We'll find our way back sooner than later  
When the moment comes, won't you call my name, name, name, uh?

The night is slow  
But we keep goin' no need to hideaway  
Fine here, just wait, we'll shine again someday  
Just don't forget, we're not alone, no, never  
Just hold on

Just interlunar, we're good, no doubt  
You will fade a bit, but not fade out  
Moonrise again, yeah, I can tell, yeah  
If you already know it well, yeah  
Just interlunar we're good, my dear  
You will fade a bit but we still near  
Moon will rise again, yeah, we know that  
If we believe and remember faith  
Just interlunar, baby
