

Up All Night

Yung Bae

Where'd all the people go
Yeah I got to know what could take them out there
Sunblock while I'm on the clock you better stop the operation I
swear
Give me something I can do for myself

It's just a little thing
Got a song to sing think nobody don't care
Whistle what you think you know better start collaboration I sw
ear
Give us something we can sing for ourselves

Working hard but playing harder all night
We never sleep we staying up till sun rise
Wind our hair and love in front of our eyes
These are the best days of our lives

Don't know if you can tell on the zinfandel that my hands are s
o high
Like stars through the monkey bars I
Watch the dandelions float through the sky
Give me something I can see for myself

Sweet dreams to the terrible things I
Let em dissappear when life is not fair
Fresh taste when the hate's erased,
Gonna wipe my tears away so don't stare

We got something, yeah we can live for ourselves.

Working hard but playing harder all night
We never sleep we staying up till sun rise
Wind our hair and love in front of our eyes
These are the best days of our lives
