

Terminator Symphony

Yung Lean

I'ma feel whatever is real, sacrifice to kill
Sacrifice to love, sacrifice the will, whatever the deal
Fuck whatever you like, I'ma get it back
All I want is to feel alive, summer night, windows down
I can feel the pain rushing through your eyes, running out of time
In this glass castle, running out of luck, who to talk?
Whatever comes down gotta come up
Since I popped I've been feeling stuck, hypnotized by the sunset
I don't wanna feel, I don't wanna run, I don't wanna kneel
Take my soul, take me, take me to the fields, just to set me free
You already know the deal, may believe the sacred fields
In an SUV, I've been here before
Walked these floors, seen the sorcery, open up the vessel, let it breathe
Running up my mind, run on silver steel
Whatever love is, is whatever kills
Whatever the deal, I'ma get it done, I'ma bring it back
Get out of the skin, whatever the sin, I was born to win
Change of plan, I'm over advanced
I can't even land, money on demand, in this ship that was built by men
Dance to the puppet man, it's the puppet master's plan

Uphill battle, like there's no tomorrow
Face my sorrows, there's no tomorrow

If I live, make it through the night
I know God is right by my side
Gave you a ride, something to live by, please make it out alive
Don't you fall for the simple cause, devil's in the fog
Just stand tall, through the winter storm, moon children, snowborn
Lay back on the same track, love, pain, and Maybach
Terminator life skills, love kills, find will
Lay back on the different path, love, pain, and-

On the track, track
