

# Victorious

Yung Lean

I was dirty in designer before it was trendy  
I was tryna stay awake  
My eyes are heavy  
I was sorry before I was even born  
So just forgive me  
By the way you're way too pretty to be petty  
I was praying for the sword to be reborn  
You didn't send me  
But I feel like it is finally descending  
When we raise our glasses up  
Its overflow is never empty  
We're victorious and happy in the ending

It was already inside me  
I didn't have to look  
For you I fight fairies  
The story is the book  
I know the feeling  
But I'm losing spirit  
What goes around comes around  
It's deep from the beginning  
Two heavy swords  
Lay heavy at the wake  
Pray for your arrival  
Never pray for your mistakes  
Wedding bells and ancient spells  
I'll meet you at the gate  
You see it in my face  
Blood rain (let the rain, let the rain)

At the edge of the blade  
That's the point  
Shooting for the stars  
But we aim for the gold  
Swimming with the sharks  
To the gods goes the spoils  
I know in my heart  
That it's all very void  
Staying very warm  
Keeping flames on the foil  
Now we wash our face  
And then spray essential oils  
Destiny is ours  
Just to hate on the boys  
You can either go hard or not  
It's a choice

Now we fly from islands like it's 2001  
Helicopters on the roof  
I make this shit look fun  
We was dirty in designer  
When the finer things would come  
And we took so many risks  
Now you see the outcome  
I fell off but I came back on top  
Lay low with the rose-  
Gold wrapped around the watch

Got bloodshot eyes  
I've been working round the clock  
SUVs by the gate  
Real estate  
Got the world in our palms

You know what  
Just stop 'cause you're not  
Darkness in my head  
It gets it spinning like a clock  
In this crystal palace  
And I dare you throw a rock  
We got so much different kind of flavours  
Come and shop  
Blowing all this money  
'Cause it's windy at the top  
You can cut it out or cut it off  
And watch it rot  
Do you wanna be with the team or not  
DGSBE we can't get enough
