

Bad Luck

Zach Top

My lucky star fell out of the sky
Right before my wishing well went dry
Seems every which way I go
There's a black cat crossing the road
Played the lottery with last month's rent
I'm still waiting on my shift to come in

Bad luck was always hanging around
A good roll was always letting me down
I had every reason in the world to give up
But you came along and now its gone
So long bad luck

My first love said she'd love me for life
Slipped out one night and never told me goodbye
My second love convinced me to love again
Then she left me for my best friend
My third and fourth went crazy as hell
I even bought a rabbit's foot but that didn't help

Bad luck was always hanging around
A good roll was always letting me down
I had every reason in the world to give up
But you came along and now its gone
So long bad luck

You're my lucky four-leaf clover
Horse shoe over my shoulder
Seven come eleven girl
I'm lucky I found you

Bad luck was always hanging around
A good roll was always letting me down
I had every reason in the world to give up
But you came along and now its gone
So long bad luck

So long bad luck
Oh, so long
