

# Unending Fortitude

Zandelle

Struggled for decades  
Hardships that we have faced  
Far beyond compare  
External compare  
Mixed with inner dissent  
More than most could bear

In a time when most would just give up  
With our faith in you strong we drive on

We will stand strong and fight on  
Our battle has just begun  
Destroy all who stand in our way  
When we're gone they'll remember  
We never surrender  
And from our true path never strayed  
Come what may

We've heard the critics?  
Condemning analysis  
Judging what thy themselves can't do  
Basing their judgement  
On pure subjectivity  
Forcing opinions on you

Who are they to display such audacity?  
We will thrive just to spite them all

We will stand strong and fight on  
Our battle has just begun  
Destroy all who stand in our way  
When we're gone they'll remember  
We never surrender  
And from our true path never strayed  
Come what may

Our faith will never falter  
Our strength grows ever more  
Our names shall live forever  
Like eagles we shall soar
