

# We Will Bring Glory Tonight

Zanister

You see us a fool so weakened  
You took our last bit of honor  
You laugh in our face so often  
You think you got us down  
You'll be surprised, when we stand

We are the power and we are the force  
We have been brought forth to fight  
We will be victors and we'll win the war  
We will bring glory tonight

On and on you've tortured  
We've heard your bile for the last time  
I think you need to be silenced  
You think you got us down  
You'll be surprised, when we stand

We are the power and we are the force  
We have been brought forth to fight  
We will be victors and we'll win the war  
We will bring glory tonight

You've lined us up for execution  
We've taken their best shot  
We'll drive you out of our homeland  
For honor we have fought

For honor we have fought

You've lined us up for execution  
You think you've got us figured out  
Your deadly ways have grown tired  
You think you got us down  
You'll be surprised, when we stand

We are the power and we are the force  
We have been brought forth to fight  
We will be victors and we'll win the war  
We will bring glory tonight

We will bring glory  
We will bring glory
