

Tsar

Zavod

A return comes this year
makes appearance again
winter is coming to freeze everything
the cold's getting colder and rips up our skins
Winter king
I hear your voice
speaking your words thru me
unwritten silent words
echoes in me

We are all from the stars

This is the year of the coming
The cold, getting colder and colder
winter is coming to freeze everything
the cold's getting colder and rips up our skins

It's closing in
with storms and winds
Tone down the lights for this one last show
display the stars in the heavens above

'Cause the northern star
crowned you the tsar
a constant reminder of where we belong

We are all from the stars

This is the year of the coming
The cold, getting colder and colder
winter is coming to freeze everything
the cold's getting colder
This is the year
This is the coming
and it's too late to prove that we're sorry
Winter is closing in - Tsar, winter king

A return comes this year
makes appearance again
I'm the blackened sun
I'm the cold
I'm the king
I'm the tsar
I'm the one

From the stars

This is the year of the coming
The cold, getting colder and colder
Winter is closing in - Tsar, winter king
This is the year
This is the coming
and it's too late to prove that we're sorry
Winter is closing in - Tsar, winter king
