

# Tsar

Zavod

A return comes this year  
makes appearance again  
winter is coming to freeze everything  
the cold's getting colder and rips up our skins  
Winter king  
I hear your voice  
speaking your words thru me  
unwritten silent words  
echoes in me

We are all from the stars

This is the year of the coming  
The cold, getting colder and colder  
winter is coming to freeze everything  
the cold's getting colder and rips up our skins

It's closing in  
with storms and winds  
Tone down the lights for this one last show  
display the stars in the heavens above

'Cause the northern star  
crowned you the tsar  
a constant reminder of where we belong

We are all from the stars

This is the year of the coming  
The cold, getting colder and colder  
winter is coming to freeze everything  
the cold's getting colder  
This is the year  
This is the coming  
and it's too late to prove that we're sorry  
Winter is closing in - Tsar, winter king

A return comes this year  
makes appearance again  
I'm the blackened sun  
I'm the cold  
I'm the king  
I'm the tsar  
I'm the one

From the stars

This is the year of the coming  
The cold, getting colder and colder  
Winter is closing in - Tsar, winter king  
This is the year  
This is the coming  
and it's too late to prove that we're sorry  
Winter is closing in - Tsar, winter king
