

Future Electric

Zayde Wolf

The futures looking electric
The future's looking electric to me
The futures looking electric
The future's looking electric to me now

I'm looking out there
A new frontier
A neon city
All of our friends are there

Been thinkin 'bout it
It's crystal clear
I wanna take you with me
Through the atmosphere

We're just living on the power of a dream
Flying into space riding on a laser beam
Looking in your eyes I can see infinity
Won't you come with me
Won't you come with me

The futures looking electric
The future's looking electric to me
The futures looking electric
The future's looking electric to me now

Let's get it going going
Let's get it
Let's get it going going
Let's get it
Let's get it going going
Let's get it
The future's looking electric to me now

Electric to me now
Electric to me now

Let's take it further
See what's beyond
Tell everybody
What's going on

Let's run together
Cause we are one
Cause we are one
Yeah we are one

We're just living on the power of a dream
Flying into space riding on a laser beam
Looking in your eyes I can see infinity
Won't you come with me
Won't you come with me

The futures looking electric
The future's looking electric to me
The futures looking electric
The future's looking electric to me now

Let's get it going going
Let's get it
Let's get it going going
Let's get it
Let's get it going going
Let's get it
The future's looking electric to me now

Electric to me now
Electric to me now

Let's get it going going
Let's get it
Let's get it going going
Let's get it
Let's get it going going
Let's get it
The future's looking electric
Electric electric to me now
