

Undertow

Zayde Wolf

Dark skies
They don't tell the truth anymore
These lies
Keep my heart twisted and torn
Goodbyes
Feels like we've been waging a war
I will stay with you into the undertow

I grow cold
It's hard to crawl out of these lows
I unfold, tied up in ebb and flow
And I keep holding
Gripping to the pain I know
I'll stay with you into the undertow

If we're swallowed by the ocean
If we're drifting in slow motion
Feeling like the sun is frozen now
Can we build what we have broken down
If we're swallowed by the ocean
I will carry you out
I will carry you out
I will carry you

Rewind
Remember when we counted stars
We Lost time
Spinning in these worlds apart
These eyes
Have we forgotten who we are

If we're swallowed by the ocean
If we're drifting in slow motion?
Feeling like the sun is frozen now
Can we build what we have broken down
If we're swallowed by the ocean
I will carry you out
I will carry you out
I will carry you
I will carry you
I will carry you
I will carry you out
I will carry you
I will carry you

If we're swallowed by the ocean
If we're drifting in slow motion?
Feeling like the sun is frozen now
Can we build what we have broken down
If we're swallowed by the ocean
I will carry you
