

# Public Enemy Number One

Zebrahead

Yeah you're going down in history  
Number one public enemy  
Treat you like a bad disease  
Everyone goes running and running and running

Back stabber  
Money grabber  
Stop talkin' shit on everyone you blabber  
You burned your bridges  
You dug your ditches  
Now you bleed alone 'cause snitches get stitches

It sucks to be you  
It sucks to be you  
No matter what you do  
Sucks to be you  
As you bleed out

Yeah you're going down in history  
Number one public enemy  
Treat you like a bad disease  
Everyone goes running and running and running

Yeah you're going down in history  
Number one public enemy  
Rest in pieces and misery  
Everyone goes running and running and running  
You're the public enemy

Back breaker  
Soul taker  
You're always tryin' way too hard, you're a faker  
Fuckin' liar  
Hung from a wire  
Over the house of lies you built, it's on fire

It sucks to be you  
It sucks to be you  
No matter what you do  
Sucks to be you  
Watch you bleed out

Yeah you're going down in history  
Number one public enemy  
Treat you like a bad disease  
Everyone goes running and running and running

Yeah you're going down in history  
Number one public enemy  
Rest in pieces and misery  
Everyone goes running and running and running  
You're the public enemy

We commit to blood loss  
Numbing up our senses but we're armed to the teeth  
And we choke and we choke and we're chokin' on the ashes  
Bleeding from the lashes, fiend fighting fascists

Let's go, let's go  
A stay of execution  
Hey ho hey ho  
We bleed the evolution  
Let's go, let's go  
We don't need no resolution  
Hey ho hey ho

We bleed out  
We bleed out

Yeah you're going down in history  
Number one public enemy  
Treat you like a bad disease  
Everyone goes running and running and running

Yeah you're going down in history  
Number one public enemy  
Rest in pieces and misery  
Everyone goes running and running and running  
You're the public enemy

You're the public enemy  
You're the public enemy!
