

No Gravity

Zedd

Dreaming 'bout a million miles away
High in the stars
Nothing here is begging me to stay
Right where we are

Run away, run away
We could run away
And leave this place for another day
Look at all the love in the Milky Way
Callin' you and me

I'm dreaming 'bout a million miles away
You're next to me, you're next to me
No stress for me, no stress for me
No gravity
No gravity

Run away, run away
We could run away
And leave this place for another day
Look at all the love in the Milky Way
Callin' you and me

Dreaming 'bout a million miles away
You're next to me, you're next to me
No stress for me, no stress for me
No gravity

Mm, we're floating in a galaxy alone
Thinking about
How anywhere I go feels like a home
When you're around
When you're around

Run away, run away
We could run away
And leave this place for another day
Look at all the love in the Milky Way
Callin' you and me

I'm dreaming 'bout a million miles away
You're next to me, you're next to me
No stress for me, no stress for me
No gravity
No gravity

Run away, run away
We could run away
And leave this place for another day
Look at all the love in the Milky Way
Callin' you and me

I'm dreaming 'bout a million miles away
You're next to me, you're next to me
No stress for me, no stress for me
No gravity

No gravity

Run away

We, we could run away

Run away

We, we could run away

Run away

We, we could run

You're next to me, you're next to me

No stress for me, no stress for me

No gravity
