

Can't Trust U

Zeina

We haven't spoke since graduation
So when I saw you I was taken back
You look as good as I remember you as
And we picked up where we left at
But its hard to fuck and not fall in love
You gotta admit it
And we get too gone when it's goin on
We can't even face it
In front of the storm we'd rather stay warm
So we hide from it
And when it gets cold you need me the most
But you don't tell me

And in the late night
You be hittin my line
After the last call just closed
You wanna come over and let go
So let go

You be out here livin like you trynna run away
I know that you come to me like I'm your escape
You be trynna tell me that I make you feel safe
All you wanna know is if I feel the same
You be out here livin like you trynna run away
I know that you come to me like I'm your escape
I see u be out and havin too much champagne
I know when you're faded not to trust what you say

Do you love me or are you high right now
Talkin to me sayin that you need me around
Do you love me
Or are you high right now
How you gon' be when you start to sober up

I just hit you when I'm faded
Then you text me like you're jaded
We don't have much conversation
But I feel like you want more than this
In a caught up situation
It's our fault we rushed it
But none of us wanna talk about it
I'm not sayin this is somethin
I just think it's complicated
Cause we fuckin just tasted it
And can't forget it

And in the late night
You be hittin my line
After the last call just closed
You wanna come over and let go
So let go

You be out here livin like you trynna run away
I know that you come to me like I'm your escape
You be trynna tell me that I make you feel safe
All you wanna know is if I feel the same
You be out here livin like you trynna run away

I know that you come to me like I'm your escape
I see u be out and havin too much champagne
I know when you're faded not to trust what you say

Do you love me or are you high right now
Talkin to me sayin that you need me around
Do you love me
Or are you high right now
How you gon' be when you start to sober up
