

You've been around making no sound
Me and your mind my child
You're getting stressed about passing the test
That make up the days of your life.
You gotta change turn the page and upstage
All of your days starting now
Well you heard the girl, its your world
And you get your way

Girl, she's telling you now this is how
You can get her to stay (yea)
you gotta get on board thats all ..to desire and
inspire
Henry: you gotta get on board, take my hand thats war,
and then you find you walked.

I will carry you
I will carry you

You gotta make your move
Careful how you choose
And I'll be here if you fall
Well you got some fight
You just might be alright
If you stay

I've started to listen
You're missing the best share of the day

Cause here is your big chance you can blow this romance
Strike while the iron is hot
Tell her the truth
Tell her all about you
Tell her you know what you've got
Cause you write the book
Just tell her will a look
She'll run straight into your arms
Cause you are the man she made plans to be with in this
life

And you make her happy, yes you can
You gotta trust that she's right
Cause you are the man she made plans to be with in this
life
