

# Deep Down

Zhavia Ward

Something deep down in my soul said, cry girl (cry, cry)  
When I saw you and that girl, walking around

I keep my blessing and my prayers in my back pocket tucked  
'Cause I know everything we receive ain't luck  
Tryna' make a name for myself  
Maybe stack a couple million on a house in the hills

Yeah, the sun will come up but will I, I, I?  
Will standing my grounds, help me fly, fly, fly?  
'Cause gravity just wants to be defied, fied, fied  
'Cause gravity just wants to be defied, fied, fied

I don't even know how I feel lately  
I don't even know what's real lately  
I don't even know how I feel lately, feel lately  
I don't even know how I feel lately  
I don't even know what's real lately  
I don't even know how I feel lately, feel lately

Something deep down  
Something deep down  
Is tellin' me, listen to your gut  
Your instincts, you should always trust  
Calling you to run run to and not from  
When they think they won won let 'em know what's to come  
'Cause this time around I'ma listen that is  
Something deep down

Every now and then we lose ourselves going round the bend  
Staying put 'cause I'm too afraid it will end  
One step back gives me three steps forward  
It's your mistakes that bring you closer

Yeah, the sun will come up but will I, I, I?  
It's written in the stars but do they lie, lie, lie?  
It's only up to me to make it right, right, right  
It's only up to me to make it right, right, right, though

I don't even know how I feel lately  
I don't even know what's real lately  
I don't even know how I feel lately, feel lately  
I don't even know how I feel lately  
I don't even know what's real lately  
I don't even know how I feel lately, feel lately

Something deep down  
Something deep down  
Is tellin' me, listen to your gut  
Your instincts, you should always trust  
Calling you to run run to and not from  
When they think they won won let 'em know what's to come  
'Cause this time around I'ma listen that is  
Something deep down  
Something deep down  
Something deep down  
Something deep down, something deep down

I can feel it deep down  
I can feel it deep down, deep down  
I can feel it deep down
