

Distant Lights

Zhu

Remember when we used to be like we could get that speed right now
9 to 12 on each night
Remember how you used to D right
Held it in just real tight
Make it bust on each time
Remember when we went to concerts
Talking bout who's on first
Waiting for the encore
I know this year don't really feel right
Wanna leave it behind
We don't want no rewind

All, all my life
I've, I've been down
All I want to be is free
All I want is peace

Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)

Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)

You told me how to keep my lean right
Walk up out the scene like
I deserve to be right (be right)

You give me confidence in me right
When I was on the decline
Preaching my beliefs right

My mama told me I got insight
Microphones that speak right
I got what they need right

I got the patience with my free time
Waiting for the key time
Shooting from the three line

All, all my life
I've, I've been down
All I want to be is free
All I want is peace

Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)

Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
Follow the distant lights (lights lights lights lights)
