Let's ride

Yeah, she my favorite song  
Keep singing, did I say too much?  
Take us back to analog  
I leave only you, cut off every network  
Hop on the turntable, ta-ta-ta  
We follow each other dancing, cha-cha-cha  
All the toxins fade, everything clears up  
One sip of cola got me feeling light

No space in between  
Lowkey blackout weekend (Uh)  
Harmony making  
I go low, and you go high (Get high)  
Opposite tones  
Different strokes  
Like blending watercolors, swirl, swirl  
Play it out, let's duet

It's stuck in my head  
A melody we build together  
A magic that gets hotter as we sing  
Don't say it, sing it to me

This and that, all of it (Yeah)  
From morning 'til night (It's us, I)  
Turn it up, we don't care ('Til the end)  
Let's go wild

Red, blue, yellow, what kind of color?  
The signal in your heart  
Whatever it is, I can't stop  
I've already fallen deep  
Make me dance  
You and I, become the music, I feel like  
I could fly anywhere, endlessly  
Harmonize tones so high

No space in between  
Lowkey blackout weekend (Uh)  
Echoes go wavy  
Faster farther (Get high)  
Starts out as chit chat  
Grows bigger, now a big band, uh  
Pieces fit together, click-click  
Play it out, let's duet

From Tokyo to Seoul, crossing time and space  
A melody we build together  
A magic that draws us closer as we sing  
Right beside me, your harmony melts into me

This and that, all of it (Yeah)  
From morning 'til night (It's us, I)  
Turn it up, we don't care ('Til the end)  
Let's go wild
