

I just wanna let you go
I follow

I see the colours fading
When I look into the night
I need to show some patience
Before you step in the light
Blue is your favorite color
Oh, it's always been mine

Tell me no, tell me now
Will it hurt
Will we make up our minds?

And I just wanna fall in love again
In the morning we touched
But we'll never be friends
And I just wanna fall in love
But we're strangers after all
Cause I know

I will never let you go
I follow
Everywhere you want to go
I follow
I want you to call my name
And we will run away
Tomorrow
I will never let you go

We used to be two lovers
But now the feeling gets old
The season turns to summer
But all I feel is the cold

And I just wanna fall in love again
In the morning we touched
But we'll never be friends
And I just wanna fall in love
But we're strangers after all
Cause I know

I will never let you go
I follow
Everywhere you want to go
I follow
I want you to call my name
And we will run away
Tomorrow
I will never let you go
I follow

I will never let you go
I follow
Everywhere you want to go
I follow
