

Whatever

Zimmer90

Whatever you see in the dark of the night
Different faces in a different light
Whatever you need, I'll be down for the ride
Feeling what you feel forever
We'll be together tonight

We fall back down just to realize
We wanted so much more
Another second just to feel alive

All we have is far from home
No place to go

Whatever you see in the dark of the night
Different faces in a different light
Whatever you need, I'll be down for the ride
Feeling what you feel forever
We'll be together tonight

It's way too loud
I wanna free my mind

All we have is far from home
No place to go

What ever you see in the dark of the night
Different faces in a different light
Whatever you need, I'll be down for the ride
Feeling what you feel forever
We'll be together tonight

Tonight, tonight
We'll be together tonight
Tonight, tonight
We'll be together tonight
Tonight, tonight
We'll be together tonight
Tonight, tonight
We'll be together tonight
