

Every time you're here I can love  
Don't you know I've been waiting so long  
Like the first time, give me this madness  
Just stay and look into my eyes

Every time you're here I can love  
Don't you know I've been waiting so long  
Like the first time, give me this madness  
Just stay and look into my eyes

This life feels right  
When you make your own choice  
What is best for you?  
When you listen to your voice  
But some type of it  
And you learn from your own mistakes  
Now you fall in love  
Dangerously arising state

For a second while  
Open your beautiful eyes  
Bring your talent  
But don't tell me lies  
Life is full of joy  
And it proves our chance  
And I love the chance at the first dance

Every time you're here I can love  
Don't you know I've been waiting so long  
Like the first time, give me this madness  
Just stay and look into my eyes

Every time you're here I can love  
Don't you know I've been waiting so long  
Like the first time, give me this madness  
Just stay and look into my eyes

This life feels right  
When you don't wanna back  
Leave each moment  
Which is keeping you in track  
It's too obvious  
I can see it in your smile  
And look at the prominent  
And now we are alive from the first time

And your line is occupied  
Maybe it was nothing at all  
And I'm still in your mind  
I'm good to play my role  
This perfect carousel  
This for kids like being you  
Find my playing well  
Find an attitude

Every time you're here I can love  
Don't you know I've been waiting so long

Like the first time, give me this madness  
Just stay and look into my eyes
