

You left me in a storm
You fucked me up about a year ago
Your leather jacket on my bedroom floor
Still reminds me of you

And I can't walk down the bowery
See through your window where we used to sleep
And every single time I see somebody leave
It reminds me of you

I've tried everything I can to erase you
If there's a machine that could make me forget you
I'd turn it on, breathe you out, clean my mind

I want it spotless, spotless
I want it spotless, spotless
I've tried everything I can to erase you, spotless

I sleep you away
I turn over and it ain't your face
And now I'm drinking to get out your taste
And forget about you

I've tried everything I can to erase you
If there's a machine that could make me forget you
I'd turn it on, breathe you out, clean my mind

I want it spotless, spotless
I want it spotless, spotless
I've tried everything I can to erase you, spotless

Want you to know, I'm letting go
But you won't fade, no, you won't fade
I'm holding on 'cause there's no one
Like you babe, like you

I've tried everything I can to erase you
If there's a machine that could make me forget you
I'd turn it on, breathe you out, clean my mind

I want it spotless, spotless
I want it spotless, spotless
I've tried everything I can to erase you, spotless
I want it spotless, spotless
I want it spotless, spotless
I've tried everything I can to erase you, spotless
