

Chemical Girl

Zug Izland

We look for love and maybe
We fall in love and have a baby
And build a storybook life
A cripple now, still broken
Everybody is joking
About the way you look now

I've seen the world through bloodshot eyes
I've seen the world with my chemical girl
I've seen the world through bloodshot eye
I've seen the world with my chemical girl

Broken down and going crazy
Medication don't phase me
Never doing what's right, right for me
I'm not scared of being hidden
Better known than faded
I keep it all locked inside

I've seen the world through bloodshot eyes
I've seen the world with my chemical girl
I've seen the world through bloodshot eyes
I've seen the world with my chemical girl

Help is guiding when I need you
Give him strength so we can see through
All the hatred and lies
Never knowing what you've been through
On top of the world with the best view
Looking down at our life

I've seen the world through bloodshot eyes
I've seen the world with my chemical girl
I've seen the world through bloodshot eyes
I've seen the world with my chemical girl
I've seen the world through bloodshot eyes (Chemical girl)
I've seen the world with my chemical girl
I've seen the world through bloodshot eyes (Chemical girl)
I've seen the world with my chemical girl
